

0.14mm-0.5mm Thick PVC Membrane Foil for Waterproofing Solutions

Our Product Introduction

Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Features: Waterproof, Anti Flame, Anti-scratch, Antibacterial etc.
- Length: 100m-400m/roll
- Width: 1260mm/1400mm
- MOQ: 2000-3000m/model
- Packaging: Rolls
- Printing: 1-5Color Printing
- Material: PVC
- Thickness: 0.14mm-0.5mm
- Highlight: **0.5mm PVC Membrane Foil, Waterproof PVC Membrane Foil**

Product Description

Product Description:

Material:

The main ingredient of our PVC foil is Polyvinyl Chloride (PVC), a synthetic plastic known for its excellent strength, flexibility, and processing simplicity.

Appearance:

We offer a variety of colors, patterns, and textures for our PVC foil. It can imitate the appearance of real materials like wood, stone, cloth, or metal, while being more affordable and maintaining a premium look.

Adaptability:

Our foil is suitable for a wide range of surfaces, including walls, doors, cabinets, and furniture. It can be effectively applied in various interior spaces.

Durability:

Realsun Deco PVC foil is known for its strength and resistance to deterioration, making it a popular choice for high-traffic areas.

Maintenance:

Once installed, our PVC foil requires minimal maintenance. It only needs to be cleaned once a week with a wet cloth, making it easy to maintain.

Economical:

PVC decorative foil is a cost-effective alternative to natural materials. It allows for the creation of sophisticated aesthetics without the high associated costs.

Modification:

Manufacturers offer a wide variety of styles and finishes, making it possible to modify the foil to satisfy project requirements and individual design preferences.

Application:

Decorative PVC foil is commonly used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other purposes in both residential and commercial settings.

Applications:

The process of membrane pressing is used to cover various types of materials such as MDF, particle board, wooden board, and fiberboard. It can be applied to doors, kitchen cabinets, wardrobes, furniture, and more. This technique involves using high pressure and heat to wrap a special decorative film onto the surface of the material, creating a seamless and durable finish.

Our wrapping profiles are designed to cover a wide range of profiles, including wood, aluminum, and PVC. These profiles are commonly used for door frames, window sills, base channels, and PVC ceilings. Using the membrane pressing process, we ensure that these profiles are wrapped flawlessly, providing a sleek and stylish aesthetic.

Cold lamination is a method that can cover various flat panels, such as wood, steel, aluminum, and PVC. This technique is commonly used for doors and furniture. By using a pressure sensitive adhesive, the decorative film adheres smoothly to the surface of the panel, providing a seamless and long-lasting finish.

Similarly, hot lamination is a method that covers PVC, steel, and aluminum panels used for doors, skirting, and more. By applying heat and pressure, the decorative film is securely wrapped onto the surface, creating a durable and attractive finish.

We also offer self-adhesive PVC films, which can be made from any of the above materials. These films are designed to be easy to use and can be applied on furniture and decorations with minimal effort. The release paper (liner) is attached to the PVC film with an environmentally-friendly acrylic adhesive, making it simple, convenient, and efficient to use.

Customization:

PVC Membrane Foil Customization Service

Brand Name: Realsun Deco

Place of Origin: Foshan, China

Our PVC Membrane Foil is a high quality and customizable product that is perfect for furniture decoration. Made from PVC material, it is durable and versatile, making it suitable for a variety of applications.

Product Specifications:

Minimum Order Quantity: 3000m/model

Price: Negotiable

Packaging Details: Pack in roll

Delivery Time: 15-20 days

Payment Terms: T/T 30% down payment, 70% balance before shipment

Supply Ability: 500000m/month

Length: 100m-400m/roll

Thickness: 0.14mm-0.5mm

Features: Waterproof, Anti Flame, Anti-scratch, Antibacterial

Surface: Smooth, Embossed, Texture, Matte, Super Matte, Soft Touch, High Gloss

Order now and enhance the look and durability of your furniture with our PVC Membrane Foil!

Packing and Shipping:

Packaging and Shipping

The PVC membrane foil is wrapped in a protective layer to prevent any damage during shipping. The rolls are labeled with the product name, dimensions, and quantity for easy identification. For shipping, the PVC membrane foil is loaded onto pallets and secured with straps to prevent shifting or damage during transit. The shipment is then loaded onto a container or truck for delivery. Customers can also request customized packaging and shipping options for their specific needs. We work with reliable and experienced shipping companies to ensure timely and efficient delivery of our products. Deliveries can be made by sea, air, or land depending on the customer's location and preference. We take great care in packaging and shipping our PVC membrane foil to ensure that it reaches our customers in perfect condition. Our goal is to provide a hassle-free experience for our customers from purchase to delivery.
